COPCAT

The Meme Coin Marshal of the Multichain OrbixVerse

Abstract:

CopCat ($CPC) is a meme coin of OrbixVerse Metaverse that prioritizes security, utility, and multichain presence. It is designed to eliminate rug pulls, offer cross-chain compatibility, and entertain the community through fun-driven utility.

This whitepaper includes:

- Project Vision and Mission

- Key Features and Technologies

- Tokenomics (with Pie Chart)

- Security and Compatibility

- Roadmap to Success

- Presale Participation Guide

- Community-Driven Ecosystem

- Disclaimer

****

Our mission:

To build a vibrant, fun, and rewarding digital universe where memes, community, and creativity drive real value for everyone in the Orbixverse ecosystem.

Our vision:

To become the world's most loved meme coin metaverse- connecting people through laughter, innovation, and especially cats and dogs.

Key Features:

1. Powered by Community:

Feature: OrbixVerse is built by the people, for the people.

Benefit: Holders shape the project's future with memes, votes, and ideas — your voice matters here.

2. Fun with Real Value

Feature: Memes meet utility.

Benefit: Earn, trade, and flex your coins while enjoying games, NFTs, and rewards that actually benefit you — not just hype.

3. Fair Launch, Transparent Future

Feature: No hidden whales, no shady deals.

Benefit: Clear tokenomics, fair presale, locked liquidity — so you can buy, sell, and hold with confidence.

4. The Meme Metaverse

Feature: More than just a coin — it's a whole world.

Benefit: Join virtual hangouts, meme battles, and exclusive drops inside OrbixVerse — where memes come alive!

Technologies:

Orbixverse is a cross-chain meme coin protocol architected on BNB Smart Chain, utilizing LayerZero's Omnichain Fungible Token (OFT) standard for secure and interoperable token bridging. The smart contract framework integrates anti-bot logic, sniper resistance, reentrancy protection, and dynamic tax-routing mechanisms. Presale operations are streamlined through automated wallet whitelisting and social engagement tracking, while price parity is maintained using deterministic liquidity routing via LayerZero and Wormhole. Supporting wrapped token deployment across Polygon, Avalanche, and Arbitrum, Orbixverse offers a gas-optimized, scalable, and DAO-ready infrastructure built for next-gen DeFi interoperability and multichain composability.

Tokenomics:

Tokenomics

- Marketing 5%
- Airdrop 5%
- Pre/Public Sale 35%
- Staking 15%
- Treasury 20%
- Team 20%

Security and Compatibility:

> Advanced Security: Anti-bot, anti-sniper, anti-theft, anti- whale, reentrancy guard

> LP Routing & Price Parity: Wormhole + LayerZero powered bridging

> Multi-chain Compatibility: Supports BNB, ARB, AVAX, POL, SOL LP locking using MUDRA safe locker.

> Community Ecosystem: Airdrops, contests, staking, and presale tools
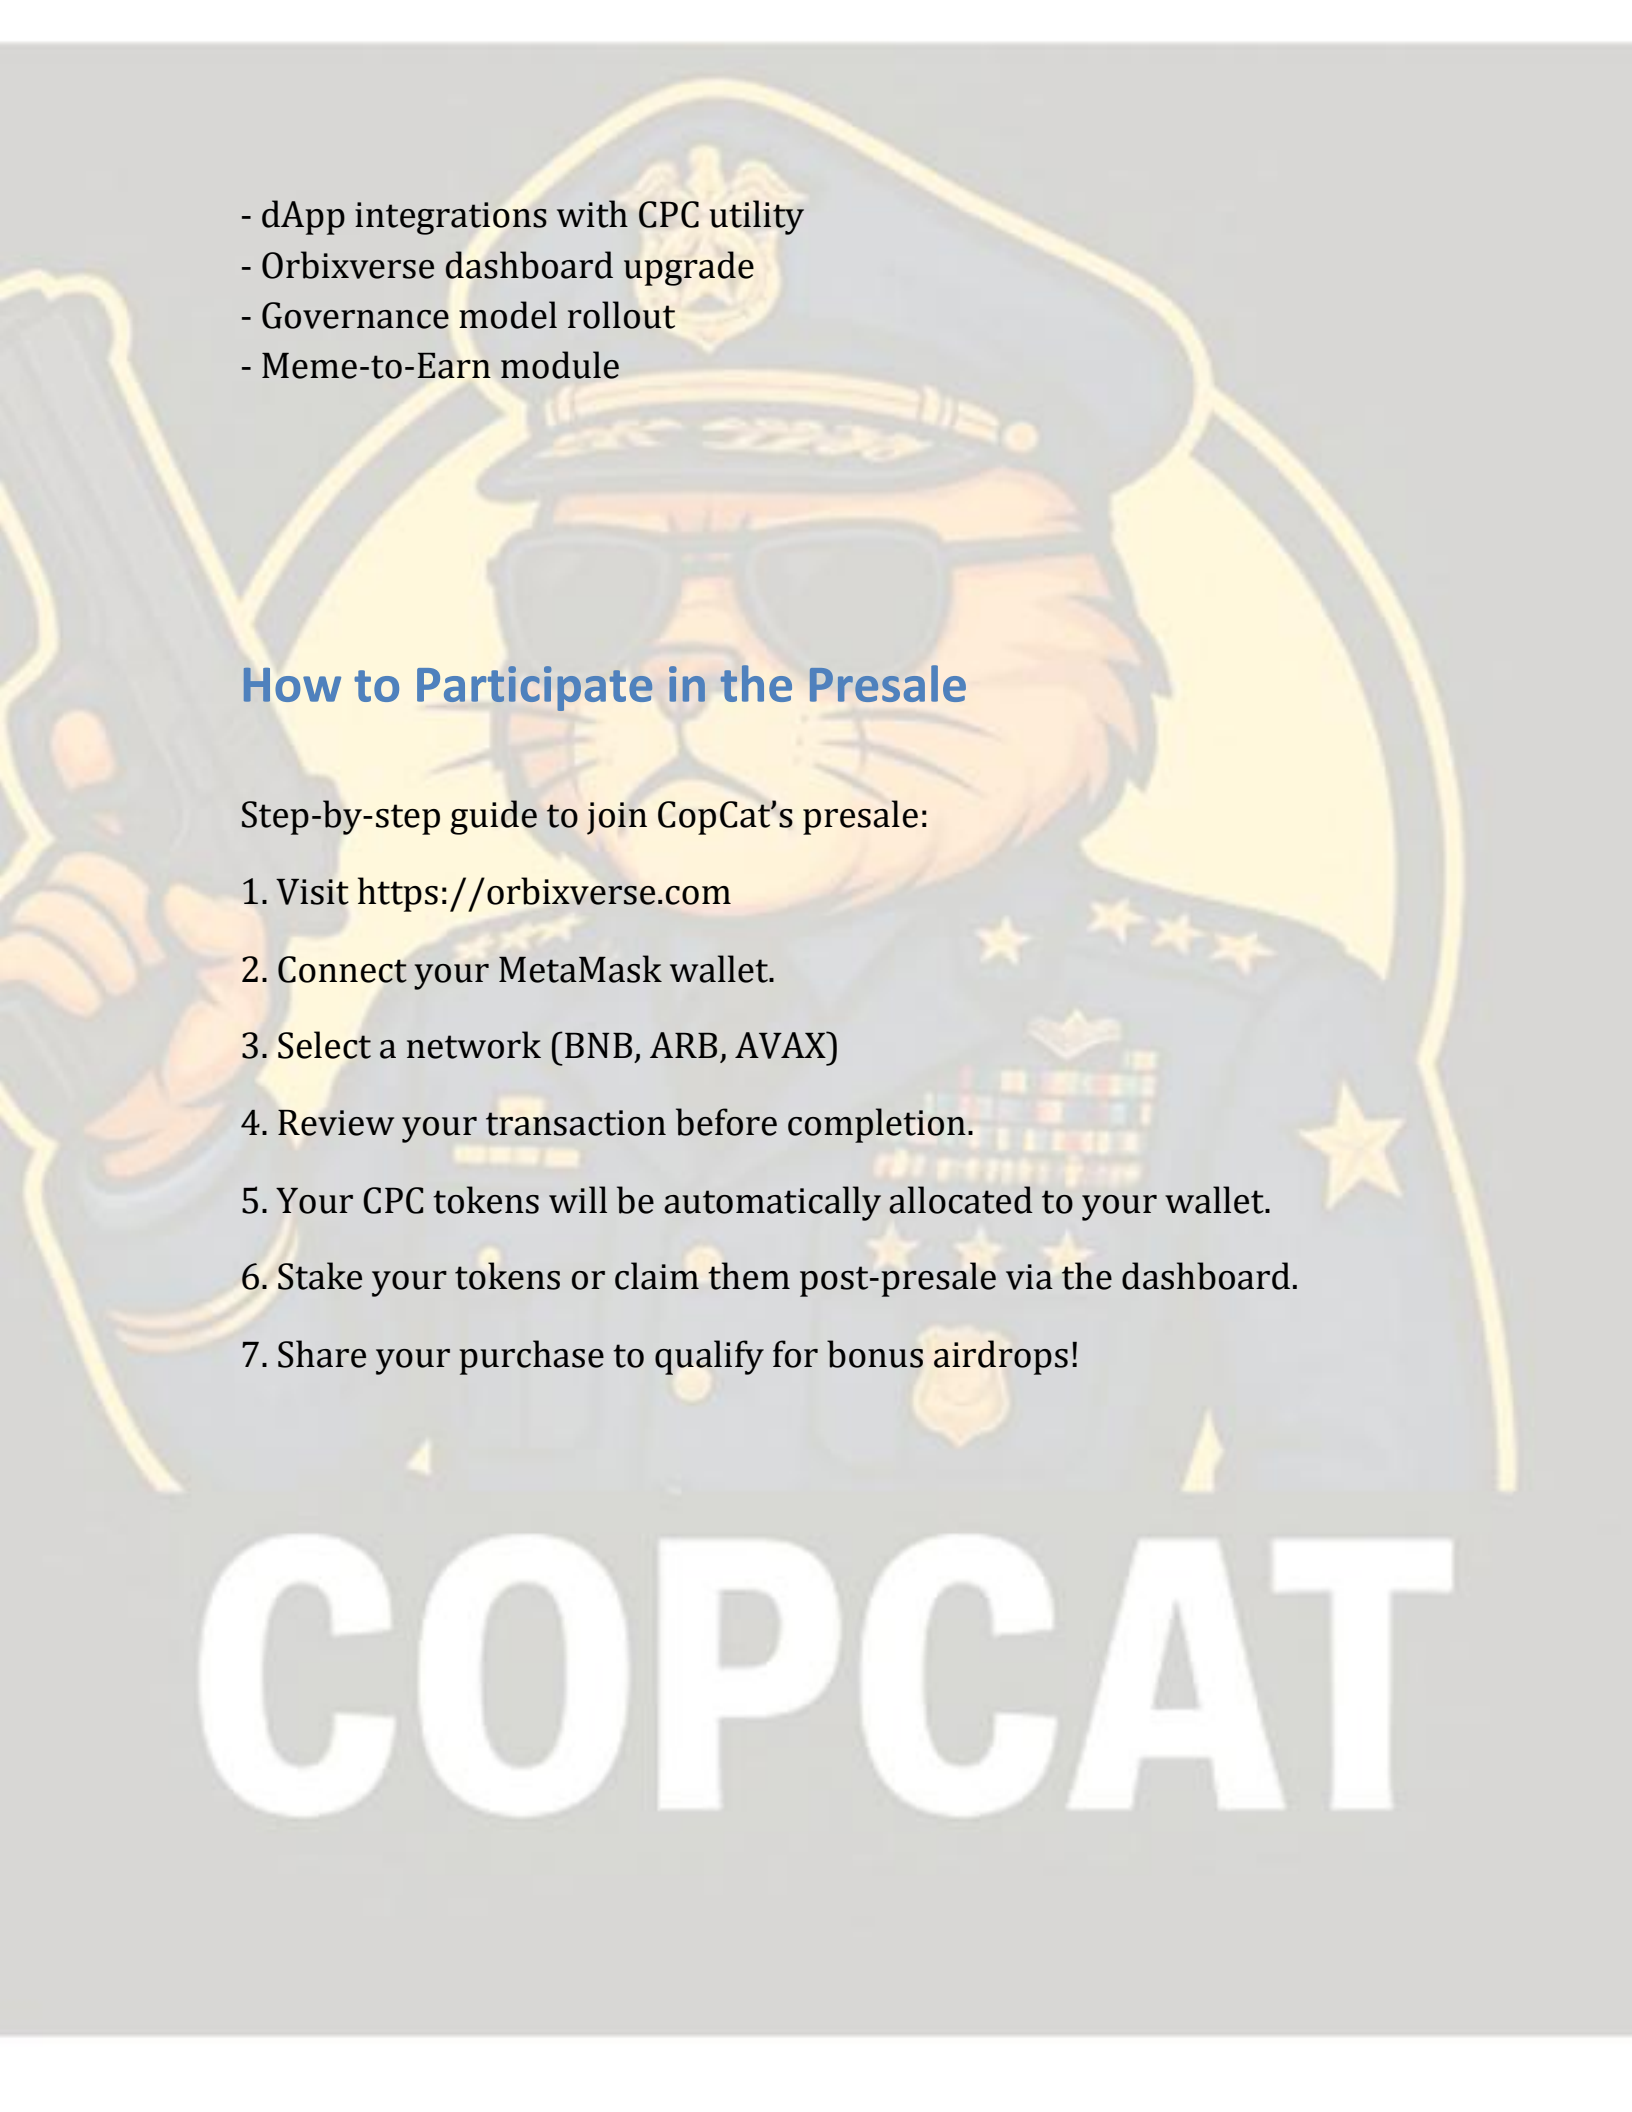

Roadmap:

Phase 1:

- Launch & Foundation
- Token deployment on BNB Chain
- Security audit and contract verification
- Team and treasury wallets secured via Gnosis
- Website + social media launch
- Presale & airdrop campaign

Phase 2:

- Expansion
- Wrapped CPC on Arbitrum, AVAX, Polygon
- Activate LayerZero & Wormhole bridging
- Launch staking system
- Community meme contest series
- Listings on CMC & CoinGecko

Phase 3:

- Ecosystem growth
- Launch NFT CopCat collection

- dApp integrations with CPC utility
- Orbixverse dashboard upgrade
- Governance model rollout
- Meme-to-Earn module

How to Participate in the Presale

Step-by-step guide to join CopCat's presale:

1. Visit https://orbixverse.com

2. Connect your MetaMask wallet.

3. Select a network (BNB, ARB, AVAX)

4. Review your transaction before completion.

5. Your CPC tokens will be automatically allocated to your wallet.

6. Stake your tokens or claim them post-presale via the dashboard.

7. Share your purchase to qualify for bonus airdrops!
